LIZARDS & SNAKES

Lizards & Snakes, an all-new exhibition at the Denver Museum of Nature & Science, features more than 60 live snakes and lizards from five continents, and explores the evolution, movement, and feeding habits of this ancient group of animals.

They're almost everywhere—harsh desert to lush rainforest, high in the treetops, beneath the ground. Whatever the environment, one of the 8,000 species of lizards and snakes on Earth calls it home.

More diverse than mammals and as old as dinosaurs, find out about the remarkable adaptations—from lightning-fast tongues to the ability to sprint across water—that have made lizards and snakes one of the most successful groups of animals on the planet.

Lizards & Snakes is FREE with Museum admission.

Presented in Denver by

Lizards & Snakes: Alive! is organized by the American Museum of Natural History, New York (www.amnh.org) in collaboration with the Fernbank Museum of Natural History, Atlanta, and the San Diego Museum of Natural History, with appreciation to Clyde Peeling's Reptiland.
